Applicant				
AstraZeneca AB et al				
This report is the international preliminary examination	n report, established by the	is International Preliminary Examining		
This report is the international preliminary examinator     Authority under Article 35 and transmitted to the appli	icant according to Article	36.		
2. This REPORT consists of a total of 7	sheets, including this cove	r sheet.		
3. This report is also accompanied by ANNEXES, compr	rising:			
		sheets, as follows:		
a. (sent to the applicant and to the Internation	- 4/a- decreinen which hav	e been amended and are the basis of this report		
sheets of the description, claims a	nd/or drawings which have ions authorized by this At	othority (see Rule 70.16 and Section 607 of the		
A desimination (Instructions)				
sheets which supersede earlier she	ects, but which this Autho	rity considers contain an amendment that goes and, as indicated in item 4 of Box No. I and the		
Supplemental Box.	national application as and			
b. (sent to the International Bureau only) a	total of (indicate type and	number of electronic carrier(s))		
	ntoining a sequence listing	and/or tables related thereto, in computer		
readable form only, as indicated in the Supplemental Box Relating to Sequence Listing (see Section 802 of the				
Administrative Instructions).				
4. This report contains indications relating to the following	ing items:			
Box No. I Basis of the report				
Box No. II Priority				
Box No. III Non-establishment of opinion with regard to novelty, inventive step and industrial applicability				
Box No. IV Lack of unity of invention				
Part No. V. Resconed statement under Article 35(2) with regard to novelty, inventive step or industrial				
approximately, extended to				
Box No. VI Certain documents cited				
Box No. VII Certain defects in the international application				
Box No. VIII Certain observations on the international application

pplication No. Internati

PCT/SE 2003/000613 **Priority** Box No. II This report has been established as if no priority had been claimed due to the failure to furnish within the prescribed time limit the requested: copy of the earlier application whose priority has been claimed (Rule 66.7(a)). translation of the earlier application whose priority has been claimed (Rule 66.7(b)). This report has been established as if no priority had been claimed due to the fact that the priority claim has been found invalid (Rule 64.1). Thus for the purposes of this report, the international filling date indicated above is considered to be the relevant date. 3. Additional observations, if necessary: The priority is considered valid.

Internal application No.

PCT/SE 2003/000613

Box No. III Non-establishment of opinion with regard to novelty, inventive step and industrial applicability			
The questions whether the claimed invention appears to be novel, to involve an inventive step (to be non obvious), or to be industrially applicable have not been examined in respect of:			
the entire international application			
Claims Nos. 14-17			
because:			
the said international application, or the said claims Nos. 14-17 relate to the following subject matter which does not require an international preliminary examination (specify):			
See PCT Rule 67.1.(iv).: Methods for treatment of the human or animal body by surgery or therapy, as well as diagnostic methods.			
the description, claims or drawings (indicate particular elements below) or said claims Nosare so unclear that no meaningful opinion could be formed (specify):			
the claims, or said claims Nos are so inadequately supported by the description that no meaningful opinion could be formed.			
no international search report has been established for said claims Nos.			
the nucleotide and/or amino acid sequence listing does not comply with the standard provided for in Annex C of the			
Administrative Instructions in that: the written form has not been furnished			
does not comply with the standard			
the computer readable form has not been furnished			
does not comply with the standard  the tables related to the nucleotide and/or amino acid sequence listing, if in computer readable form only, do not comply we the tables related to the nucleotide and/or amino acid sequence listing, if in computer readable form only, do not comply we the tables related to the nucleotide and/or amino acid sequence listing, if in computer readable form only, do not comply we			
the tables related to the nucleotide and/or amino acid sequence insting, it is to be a the technical requirements provided for in the Annex C-bis of the Administrative Instructions.			
See Supplemental Box for further details.			

Internation pplication No.

PCT/SE 2003/000613

Box	No. V	Reasoned statement un citations and explanation	ider Article 3: pns supportin	5(2) with regard to novelty, inventive step or industrial applicability ag such statement	y; 
1.	Statement				×m0
	Novel	lty (N)	Claims Claims	1-13, 18-22	YES
	Inven	ntive step (IS)	Claims Claims	1-13. 18-22	YES NO
	Indus	strial applicability (IA)	Claims Claims	1-13, 18-22	YES NO

2. Citations and explanations (Rule 70.7)

The following documents were cited in the search report:

- D1) WO 9903859 A1
- D2) WO 0042044 A1
- D3) WO 0045846 A1

The claimed invention relates to novel spiro[1-azabicyclo[2.2.2]octane-3,2'(3'H)-furo[2,3-b]pyridine] derivatives, which are potent ligands for nicotinic acetylcholine receptors (nAChR's) and can be used for the treatment of disorders related to this ligand.

D1, which is considered to be the most relevant document, relates to structurally very close compounds with the same therapeutical use. The claimed compounds only differ from the known compounds through the substitution on the furo[2,3-b]pyridine group in the 5'position. In the claimed compounds the substitution represents an eventually substituted "fury1" "benzofury1" or "isobenzofury1" group while the substitution in known compounds represents listed from examples 15-18,21-22 and 38 of "morpholino", "azetidiny", "pyridy1", especially "2-fury1" or "piperaziny1" group.

The closest compound from D1 is when the substitution in the 5'position is "furyl" group. In D1 it is an unsubstituted "2-furyl" group and in the application it is a substituted "2-furyl" or a substituted "3-furyl" group.

The problem to be solved by the present invention may therefore be regarded as novel spiro[1-azabicyclo[2.2.2]octane-3,2'(3'H)-furo[2,3-b]pyridine] derivatives which are potent ligands for nicotinic acetylcholine receptors (nAChR's) and can be used for the treatment of disorders related to this ligand.

#### Supplemental Box

In case the space in any of the preceding boxes is not sufficient. Continuation of: Box  $\,V\,$ 

This is achieved with the novel derivatives.

Regarding the cited document above, it would be obvious to a person skilled in the art to prepare the claimed compounds and that the novel compounds would achieve the same therapeutical effect as the known compounds in D1.

The paragraphs on pages 11-12 regarding the pharmacology tests describe tests that are the same tests as in D1. The applicant has not shown that the claimed compounds are likely to have any unexpected beneficial effect over the prior art.

Thus, the claimed invention in claims 1-13 lacks inventive step.

Claims 18-20, which relate to the compounds wherein one or more of the atoms is a radioisotope and to the use the compounds in screening, are considered to involve particular executions obvious to a person skilled in the art for which patent protection is not justified. Thus, claims 18-20 lack inventive step.

Claims 21 and 22 relate to spiro[1-azabicyclo[2.2.2]octane-3,2'(3'H)-furo[2,3-b]pyridine] derivatives as intermediate for the preparation of the claimed compounds.

D2 relates to structurally close spiro[1-azabicyclo[2.2.2]octane-3,2'(3'H)-furo[2,3-b]pyridine] derivatives as intermediate (structure VI) for the preparation of 5'or 6'substituted spiro[1-azabicyclo[2.2.2]octane-3,2'(3'H)-furo[2,3-b]pyridine] derivatives.

Thus, claims 21-22 lack inventive step.

D3 relates to pharmaceutical compositions containing nicotine or a ligand of nicotine receptors and a monamine oxydase inhibitor and their use.

D3 discloses the general state of art and is not considered to be of particular relevance.
